Srujal Choudary Dhulipala

BSC COMPUTER SCIENCE · OXFORD BROOKES UNIVERSITY

CONTACT

Swindon, UK

+44 74599 09458

dhulipalasrujal@gmail.com

CORE SKILLS

Problem Solving · Data Analytics · Communication · Teamwork · Research · Time Mgmt · Adaptability

TECHNICAL SKILLS

Languages
Python, TypeScript, HTML/CSS, LEGO Mindstorms

Software & Data
MS Excel, MS Office, Google Workspace, Chi-squared (χ^2) analysis

Development
Client-server architecture, authentication, password hashing, debugging

IT & Systems
Basic networking, hardware troubleshooting & Chromebook repair

AVAILABLE IMMEDIATELY
Wednesdays, Fridays, Saturdays & Sundays

PROFILE

Computer Science student with strong analytical, technical, and communication skills. Experienced in full-stack project development, statistical data analysis, and technical troubleshooting, with a proven ability to independently master complex technologies and solve practical problems.

EDUCATION

Oxford Brookes
Sep 2026 – Present
BSc Computer Science

Swindon Academy
Sep 2024 – Jun 2026
A-Levels: Maths (A), Physics (B), CS (B), Further Maths (C)

Trinity Academy
Sep 2023 – Jun 2024
7 GCSEs: Maths (8), Eng Lit (6) & Science (9–8)

EXPERIENCE

Sales Colleague — Oct 2026 – Present
Currys — Swindon
Building customer-service and communication skills in a retail environment, helping customers with their enquiries and working collaboratively with the store team.

Private GCSE Mathematics Tutor — Academic Year
Secondary School Tutoring
Delivered weekly 1.5-hour targeted tutoring sessions over a full academic year. Broke down difficult mathematical concepts, built student confidence, and tailored lesson plans to individual learning needs.

Oxwash — Work Experience — Placement
Shadowed professionals across software engineering, product management, and data analytics. Observed agile sprint planning, technical prioritization, and cross-team communication.

School IT Department — Work Experience — Placement
Diagnosed and repaired faulty Chromebooks, building hands-on hardware and software troubleshooting skills. Methodically organized inventory and managed equipment logistics.

PROJECTS

Online Multiplayer Platformer (CS NEA)
Independently developed an online platformer using Python. Engineered a custom client-server model supporting user authentication, password verification, and real-time multiplayer battles with custom hashing algorithms.

Autonomous Robotics Project
Led the programming team for a 6-person project constructing an autonomous obstacle-avoiding robot using LEGO Mindstorms. Coordinated a two-week development and testing schedule.

Statistical Data Analysis
Analyzed geological datasets in Microsoft Excel by conducting a Chi-squared (χ^2) test, calculating expected frequencies and automating repetitive calculations to improve efficiency.

ACADEMIC ENRICHMENT & LEADERSHIP

Academic Student Mentor — Secondary Mentoring
Delivered targeted 1-on-1 academic support to a secondary student struggling with key coursework. Identified specific learning gaps, simplified complex topics, and adapted teaching methods to build confidence.

Cambridge & Marlborough College Programme
Researched quantum phenomena independently and presented findings on subatomic physics, demonstrating clear scientific communication.

School Scholars Programme — Quantum Computing
Investigated quantum computing architectures beyond the A-Level curriculum, exploring qubit state manipulation and emerging technological applications.

Model United Nations — School Club
Researched international policy issues, presented arguments, and negotiated resolutions across diverse year groups.

ADDITIONAL TECHNICAL LEARNING

Independently researched TypeScript and Chromium Architecture. Designed and built this CV as a web document in HTML and CSS, testing across modern browsers for print optimization.
